

How your money could help

The money you raise will be used to fund a variety of projects supporting young people and adults with learning disabilities and autism.

£10

could buy tools for our social enterprise project where people get training and skills in gardening and horticulture.

£15

could buy utensils for one of our catering projects.

£20

could buy three hours of one to one support from a Travel Buddy; enabling individuals to gain the skills and confidence to travel on public transport, overcoming isolation and building confidence and self-esteem.

£50

could buy arts and crafts materials, enabling creative activities that encourage self-expression and develop social skills.

£75

could buy seven hours of additional support for an individual to get out and about and take part in social activities within their local community.

£120

could pay for one day at our summer camp for a young person, where they'll gain independence and self-confidence, make new friends and learn about choices in the transition into adulthood.

£120

could buy a digital camera designed for the needs of people with learning disabilities.

£150

could buy software packages to help people we support improve their literacy.

£200

could pay for someone we support to have a relaxation session with a qualified therapist, improving their quality of life.

£1000

could buy innovative technology allowing people with multiple learning disabilities to take control of their environment; it could be something as simple as being able to control the TV, lights, music or heating, but can make a massive difference to a person's wellbeing.

£500

could buy farming equipment for use at our Elm Tree Farm project.

£2000

could buy specialist sensory equipment to provide a stimulating environment for people with multiple learning disabilities.

£5000

could renovate a garden in one of our residential homes, providing tranquil areas, vegetable plots, stimulation and sensory planting, accessibility for wheelchair users and a safe space where residents can relax.
